

Bronze Layer - Data Ingestion Flow Documentation

Platform: Snowflake + Matillion | Coverage: All Domains | Layer: Bronze (RAW)

Document Type: Production Reference Document

Scope: End-to-end Bronze layer data ingestion flows across all 44 active data domains

1. Executive Summary

This document provides a comprehensive reference for all Bronze layer data feeds across the data platform. It covers 44 data domains ingested from multiple source systems including Snowflake Share, Amazon S3, SFTP, and API connections, and loaded into Snowflake Bronze or Bronze_PSP schemas via Matillion ETL pipelines.

The document serves as the single source of truth for:

- End-to-end data flow from source to Snowflake Bronze layer
- Source file names and table mappings per domain
- Matillion pipeline names responsible for each ingestion
- Load strategy (Full Load or Incremental) per domain
- Scheduling, frequency, and execution dependencies
- Operational notes and special handling requirements

2. Scope and Platform Overview

Attribute	Detail
Platform	Snowflake + Matillion
Layer	Bronze (RAW) - no transformations applied
Total Domains	44
Source Systems	Snowflake Share, Amazon S3, SFTP, API
Load Strategies	Full Load, Incremental

Attribute	Detail
Target Schemas	BRONZE, BRONZE_PSP
Regions	US (primary), EMEA, Japan, Canada (CA)
Orchestration	Matillion (US region), Lambda (trigger-based)
Downstream	Silver and Gold layers via dbt transformations

3. End-to-End Architecture

All Bronze ingestion flows follow a consistent four-stage architecture:

Stage	Layer	Description	Examples
1	Source	Raw data originates from Snowflake Share, S3 buckets, SFTP servers, or direct APIs	Snowflake Share, S3, SFTP, Veeva CRM API
2	Matillion Pipeline	ETL jobs extract, transfer, clone, or ingest data from source into Snowflake	o_transfer_*, o_ingest_*, o_clone_*
3	Bronze / Bronze_PSP	Raw data written as *_RAW tables with no transformations or business logic applied	MEDISAFE_USER_RAW, IQVIA_AMA_NPI_RAW
4	Downstream (Silver/Gold)	Trigger-based dbt models transform Bronze into Silver and Gold layers	o_daily_psp_data_model_refresh_job_dbt

Source Type Classification:

- Snowflake Share: Data shared from partner or internal Snowflake accounts as STG_* views.
- S3: Files dropped to Amazon S3 buckets in CSV, XLSX, TXT, or Parquet format.
- SFTP: Secure file transfer from vendor systems (Veeva Network, Kalderos).
- API: Direct API-based incremental extraction (Veeva CRM, AMIR).

4. Domain Master Reference - All 44 Domains

The following table provides a consolidated view of all Bronze data domains, their source systems, load strategies, target schemas, and Matillion pipeline(s).

#	Domain	Source	Load Type	Schema	Matillion Pipeline(s)
1	Medisafe (Non-PSP)	Snowflake Share	Full Load	BRONZE	o_transfer_medisafe_s3_files, o_ingest_medisafe_data
2	Medisafe (PSP)	Snowflake Share	Full Load	BRONZE_PSP	o_clone_weekly_zs_landing_medisafe_tables, o_daily_psp_bronze_refresh_job
3	Precision	Snowflake Share	Full Load	BRONZE	o_ingest_precision_data
4	Qral	S3	Full Load	BRONZE	o_ingest_qral_s3_files
5	Pulsepoint	S3	Full Load	BRONZE	o_transfer_pulsepoint_s3_files, o_ingest_pulsepoint_data
6	SpringBond (HCP Marketing Media)	Snowflake Share	Full Load	BRONZE	o_ingest_bronze_snb_data
7	Veeva Network	SFTP	Full Load	BRONZE	o_ingest_veeva_network_files, o_ingest_veeva_network_count_update
8	Customer Ship-to-List	S3	Full Load	BRONZE	x_ingest_customer_ship_s3_files
9	Veeva CRM	API	Incremental	BRONZE	o_ingest_veeva_crm_salesforce, o_ingest_veeva_crm_salesforce_dlt
10	AMIR	API	Incremental	BRONZE	o_ingest_bronze_amir_data, o_ingest_bronze_amir_count_update
11	iHub	S3	Full Load	BRONZE	o_transfer_ihub_s3_files, o_ingest_ihub_data
12	Veeva Align	S3	Incremental	BRONZE	o_ingest_veeva_align_bronze_data
13	ZS Landing Cardinal (3PL)	Snowflake Share	Full Load	BRONZE	o_clone_zs_landing_cardinal_tables

#	Domain	Source	Load Type	Schema	Matillion Pipeline(s)
1 4	H1 (5_02) - HCP Data	S3	Full Load	BRONZE	o_ingest_h1_data_s3_parquet, o_ingest_h1_data_details
1 5	Quest	S3	Incremental	BRONZE	o_ingest_quest_s3_files, o_ingest_quest_details
1 6	IQVIA Master (Tokenization)	Snowflake Share	Full Load	BRONZE	o_clone_zs_landing_tables
1 7	EVERSANA	S3	Incremental	BRONZE	o_ingest_eversana_s3_files
1 8	H1 (5_05) - Clinical Study Data	S3	Full Load	BRONZE	o_ingest_h1_SOS_data_s3_parquet
1 9	SpringBond (Marketing Data Mapping)	Snowflake Share	Full Load	BRONZE	o_ingest_marketing_media_interaction
2 0	MMIT (Data Feed)	S3	Incremental	BRONZE	o_ingest_mmit_s3_files
2 1	MMIT (PAR Feed)	S3	Incremental	BRONZE	o_ingest_mmit_s3_files
2 2	PREMIER HEOR	S3	Full Load	BRONZE	s_ingest_premier_analytical_data
2 3	CMEA	S3	Incremental	BRONZE	o_run_orchestration_master_end_to_end
2 4	UKI Data	S3	Full Load	BRONZE	o_ingest_uki_data
2 5	Bayshore	S3	Full Load	BRONZE	o_ingest_bayshore_data
2 6	Toho	S3	Incremental	BRONZE	o_ingest_combined_toho_automation
2 7	Clinical Trials	S3	Full Load	BRONZE	o_ingest_clinical_trials_data
2 8	JP (Japan Vial Shipment)	S3	Incremental	BRONZE	o_transform_silver_global_vial_shipment_toho
2 9	IQVIA DDD	S3	Incremental	BRONZE	o_ingest_iqvia_ddd_bronze_load

#	Domain	Source	Load Type	Schema	Matillion Pipeline(s)
30	TXHUB	S3	Full Load	BRONZE	o_ingest_txhub_s3_files
31	JIRA	S3	Full Load	BRONZE	o_ingest_jira_data
32	KALDEROS	SFTP	Full Load	BRONZE	o_ingest_kalderos_all_files
33	IQVIA Pinpoint	Snowflake Share	Full Load	IQVIA_PINPOINT / BRONZE	o_ingest_pulsepoint_to_veevaCRM_1
34	Veeva Network (DCR)	SFTP	Full Load	BRONZE	o_ingest_veeva_network_files
35	IQVIA Med_B	Snowflake Share	Incremental	BRONZE	o_end_to_end_iqvia_medb_monthly_pipeline
36	IQVIA AMA	Snowflake Share	Full Load	BRONZE	o_end_to_end_iqvia_ama_monthly_pipeline
37	IQVIA HPD	Snowflake Share	Full Load	BRONZE	o_end_to_end_iqvia_hpd_quarterly_pipeline
38	IQVIA LAAD MG Weekly	Snowflake Share	Incremental	BRONZE	o_end_to_end_iqvia_laad_mg_weekly_pipeline
39	IQVIA LAAD MG Monthly	Snowflake Share	Incremental	BRONZE	o_end_to_end_iqvia_laad_monthly_pipeline
40	IQVIA LAAD CIDP Monthly	Snowflake Share	Incremental	BRONZE	o_end_to_end_iqvia_laad_monthly_pipeline
41	NCM (PSP)	Snowflake Share	Full Load	BRONZE_PSP	o_daily_psp_bronze_refresh_job
42	NCM (Non-PSP)	Snowflake Share	Full Load	BRONZE	o_clone_zs_landing_tables
43	Marketo	Snowflake Share	Full Load	BRONZE	o_clone_zs_landing_tables
44	SP (Non-PSP) - Specialty Pharmacy	Snowflake Share	Full Load	BRONZE	o_clone_zs_landing_tables

5. Detailed Domain Data Flows

The following sections provide the complete source-to-target table mapping for each domain. Each domain entry includes a summary card and a full table mapping.

Domain 1: Medisafe (Non-PSP)

Attribute	Detail
Domain Name	Medisafe (Non-PSP)
Source System	Snowflake Share
Load Type	Full Load
Target Schema	BRONZE
Matillion Pipelines	o_transfer_medisafe_s3_files, o_ingest_medisafe_data
Total Tables	16

Source-to-Target Table Mapping

#	Source File / Table	Snowflake Target Table (Bronze RAW)
1	STG_MEDISAFE_USER_SURVEY	MEDISAFE_USER_SURVEY_RAW
2	STG_MEDISAFE_APPOINTMENTS	MEDISAFE_APPOINTMENTS_RAW
3	STG_MEDISAFE_USER_CALCULATED_METRICS	MEDISAFE_USER_CALCULATED_METRICS_RAW
4	STG_MEDISAFE_COMPONENT	MEDISAFE_COMPONENT_RAW
5	STG_MEDISAFE_COMPONENT_PUSH_CLICKS	MEDISAFE_COMPONENT_PUSH_CLICKS_RAW
6	STG_MEDISAFE_COMPONENT_ROOM_ENGAGEMENT	MEDISAFE_COMPONENT_ROOM_ENGAGEMENT_RAW
7	STG_MEDISAFE_DAILY_APP_ACTIVITY	MEDISAFE_DAILY_APP_ACTIVITY_RAW
8	STG_MEDISAFE_MEDICATION	MEDISAFE_MEDICATION_RAW

#	Source File / Table	Snowflake Target Table (Bronze RAW)
9	STG_MEDISAFE_MG_ADL_TRACKER	MEDISAFE_MG_ADL_TRACKER_RAW
10	STG_MEDISAFE_REMINDERS	MEDISAFE_REMINDERS_RAW
11	STG_MEDISAFE_SURVEY_METADATA	MEDISAFE_SURVEY_METADATA_RAW
12	STG_MEDISAFE_USER	MEDISAFE_USER_RAW
13	STG_MEDISAFE_USER_SALESFORCE	MEDISAFE_USER_SALESFORCE_RAW
14	STG_MEDISAFE_NURSE	MEDISAFE_NURSE_RAW
15	STG_MEDISAFE_PATIENT	MEDISAFE_PATIENT_RAW
16	STG_MEDISAFE_STATE	MEDISAFE_STATE_RAW

Domain 2: Medisafe (PSP)

Attribute	Detail
Domain Name	Medisafe (PSP)
Source System	Snowflake Share
Load Type	Full Load
Target Schema	BRONZE_PSP
Matillion Pipelines	o_clone_weekly_zs_landing_medisafe_tables, o_daily_psp_bronze_refresh_job
Total Tables	13
Notes	Trigger-based: runs after Non-PSP Patient Silver and Gold layers complete. Window: Weekdays, 12:45-1:15 am EST.

Source-to-Target Table Mapping

#	Source File / Table	Snowflake Target Table (Bronze RAW)
1	STG_MEDISAFE_APPOINTMENTS	MEDISAFE_APPOINTMENTS_RAW
2	STG_MEDISAFE_SALESFORCE	MEDISAFE_SALESFORCE_RAW
3	STG_MEDISAFE_USER_SURVEY	MEDISAFE_USER_SURVEY_RAW
4	STG_MEDISAFE_COMPONENT	MEDISAFE_COMPONENT_RAW
5	STG_MEDISAFE_COMPONENT_PUSH_CLICKS	MEDISAFE_COMPONENT_PUSH_CLICKS_RAW
6	STG_MEDISAFE_COMPONENT_ROOM_ENGAGEMENT	MEDISAFE_COMPONENT_ROOM_ENGAGEMENT_RAW
7	STG_MEDISAFE_MEDICATION	MEDISAFE_MEDICATION_RAW
8	STG_MEDISAFE_DAILY_APP_ACTIVITY	MEDISAFE_DAILY_APP_ACTIVITY_RAW
9	STG_MEDISAFE_MG_ADL_TRACKER	MEDISAFE_MG_ADL_TRACKER_RAW
10	STG_MEDISAFE_REMINDERS	MEDISAFE_REMINDERS_RAW

ACTIVE	US	Matillion	Ingestion	DCR	us_network_dcr	o_ingest_dcr_files	Daily	At 02:30, every day in America/New_York timezone

7. PSP Execution Dependency Chain

PSP domain ingestion (Medisafe PSP, NCM PSP) is trigger-based and depends on the successful completion of Non-PSP Silver and Gold layers. The full execution chain is as follows:

Step	Process	Description	Trigger Condition
1	Non-PSP Bronze Ingest	Extract STG tables from Snowflake Share; load to BRONZE schema	Scheduled - weekdays
2	Non-PSP Silver (dbt)	Transform Bronze RAW into cleansed Silver tables	Trigger after Step 1
3	Non-PSP Gold (dbt)	Aggregate Silver into Gold - Patient domain complete	Trigger after Step 2
4	PSP Clone (Cardinal/Medisafe/NCM)	Clone ZS landing tables and prepare PSP staging area	Trigger after Step 3 - approx 9:30 AM EST
5	PSP Bronze Refresh	Full load PSP tables into BRONZE_PSP schema (12:45-1:15 am EST)	Trigger after Step 4

Step	Process	Description	Trigger Condition
6	PSP dbt Refresh	Refresh PSP Silver and Gold dbt models	Trigger after Step 5

8. Operational Notes and Considerations

- Full Load strategy truncates and replaces all records on each run. There is no merge or upsert logic at the Bronze layer.
- Incremental domains (Veeva CRM, AMIR, Quest, Veeva Align, IQVIA LAAD, MMIT, EVERSANA, Toho, CMEA, JP, IQVIA DDD, Kalderos) append or delta-load records and use _DELTA suffix in target table names where applicable.
- PSP domains (Medisafe PSP, NCM PSP) use the BRONZE_PSP schema and are entirely dependent on Non-PSP Silver and Gold completion before execution.
- Parquet-format domains (H1 5_02, H1 5_05) use dedicated parquet ingestion pipelines (o_ingest_h1_data_s3_parquet, o_ingest_h1_SOS_data_s3_parquet).
- One-time loads: Customer Ship-to-List and PREMIER HEOR were loaded once and are not scheduled for repeat ingestion.
- Quest domain uses dq_audit.etl_domain_metadata for dynamic file processing. The b_date variable must be managed carefully on first run (set to 20250711 for historical load, then unset the default).
- Kalderos eligibility file tabs (FULL, ADDED, REMOVED, UPDATED) are mapped to separate delta target tables using the tab name as a suffix.
- SpringBond contributes two separate feed types: HCP Marketing Media Interactions (22 channels) and Marketing Data Mapping.
- IQVIA LAAD data covers three distinct domains: MG Weekly (L80952), MG Monthly (L210512), and CIDP Monthly (L62123), each with its own pipeline.
- All Matillion schedules operate in America/New_York timezone unless explicitly noted (Japan schedules use Asia/Tokyo timezone).
- INACTIVE schedules are retained in the schedule registry for reference and can be re-activated as needed.
